Summary

Full Stack Developer skilled in designing and building scalable applications using Node.js, Next.js, and modern JavaScript frameworks. Experienced in creating robust APIs, integrating cloud platforms like Firebase and Google Cloud, and collaborating with cross-functional teams to deliver high-quality software solutions.

Skills

Java

TypeScript / JavaScripr

React.js / Angular

Node.js / Express.js

API Development / API Testing

Firebase / Google Cloud

Cloudflare workers

Postman

Project Management

Certifications

- Data Structures (Coursera, Oct 2023)
- The Modern Angular Bootcamp (Udemy, Mar 2023)
- Data Structure (October 2023)
- Complete java programming (September 2025)

EXPERIENCE

Full Stack Developer (Full Time)   **02 / 2025 - 07 / 2025**

GreenHouse BrandWorks (India - Bangalore)

- Developed and maintained websites using Next.js, React.js, Wix, and WordPress
- Delivered responsive, SEO-optimized solutions in collaboration with design teams
- Implemented Google Analytics & automations for performance and marketing insights
- Managed client deployment, handled technical queries and feedback

Software Engineer (Full Time)   **02 / 2024 - 12 / 2024**

Lokveeraj Tech Solutions (India - Bangalore)

- Started as intern, advanced to full-time; specialized in Node.js, Firebase, Angular, and Next.js
- Connected and tested APIs, set up environments in Postman, documented architecture
- Developed/deployed Firebase Functions, integrated Google Cloud (PubSub, Buckets, Cloud Functions)
- Worked with Supabase, Hono.js, and Cloudflare for API hosting

Software Engineer (Internship)   **05 / 2023 - 07 / 2023**

JustPic (India - Bangalore)

- Developed and integrated IoT utilities, enabling seamless smart device connectivity and real-time data updates within the JustPic platform
- Implemented RESTful APIs in Node.js for device management, user authentication, and secure data exchange
- Enhanced both frontend (React.js/Next.js) and backend systems, accelerating feature delivery and improving platform usability
- Collaborated with cross-functional teams to troubleshoot, optimize, and deploy new product features for scalability and reliability

Education

B-Tech : ECE   **2020 – 2024**

GITAM University, (Bangalore) - 8.14

Intermediate : MPC   **2018 – 2020**

Sri Chaitanya Junior College, (Vijayawada) - 9.44

Projects

- **Veerians :**

  Built a full-featured HR platform covering payroll, attendance, onboarding, and performance analytics; streamlined dashboards and team management.
  Next.js | Firebase | Cloud Functions | TanStack | Tailwind | stripe | razorpay |Doppler

- **Just Smart Power Box :**

  Created a smart automation system to control washing machines via QR code; integrated payment processing and user role management for secure access.
  Arduino | Firebase | IoT | Firabase functions | razorpay | Flutter

- **Grasscutter Vision-Guided Robotic System:**

  Developed an autonomous robot for grass cutting using vision-guided navigation and live video streaming; enabled remote control via web interface.
  C++ | Arduino | IoT | Embedded Systems

Achievements

- Top 10 rank, Smart Indian Hackathon 2023
- Leadership Certificate, Product Management (JustPic)
- Technical Excellence, IoT Implementation & Frontend Development (JustPic)
- Finalist, Gitam Bangalore 2020 Cricket Tournament
